Atuarluarina

Med denne folder ønsker Grønlands Statistisk og Grønlands Turist- og Erhvervsråd at præsentere Grønland som turistmål ud fra statistiske materialer. Det er vores håb, at folderen vil give et godt og overskueligt billede af turismen i landet. Der kan findes mere information og statistik på vores hjemmesider.

God læselyst

With this folder it is the intention of Statistics Greenland and Greenland Tourism & Business Council to present Greenland as a tourist destination based on statistical material. It is our hope that this folder will give a good and well presented overview of the tourism in Greenland. You can find more information and statistics on our web-sites.

Enjoy reading

## Flytransporten

**Lufthavnene:** Langt størsteparten af personer kommer til og fra Grønland med fly, men også store mængder fragt og post befordres ad luftvejen. Der er 12 lufthavne og 47 helikopter-pladser. De to største internationale lufthavne hedder Kangerlussuaq/Søndre Strømfjord og Narsarsuaq.

**Beflyvningerne:** Året rundt er det muligt at komme til Grønland fra Danmark (København) fem dage om ugen med det nationale luftfartsselskab Air Greenland A/S. Om sommeren (juni-august) er der dog forbindelse 7 dage om ugen med op til 12 ugentlige flyvninger. Air Iceland varetager trafikken mellem Island og den grønlandske østkyst. Air Iceland beflyver også vestkysten (Ilulissat, Nuuk og Narsarsuaq) i højsæsonen.

**Afgange og Passagerer:** I 2008 startede 33.196 fly fra lufthavne, heliporte og helistop. Der var samtidig 432.067 afrejsende passagerer. Der har været en kraftig vækst i antallet af afrejsende passagerer de senere år.

### **Air Greenland A/S**

*Antal fly og helikoptere i flåden pr. april 2009:* 33

## Transportation by air

**Airports:** The largest part of visitors to and from Greenland arrives by plane, but also a lot of freight and posts are coming by air. There are 12 airports and 47 heli-places. The two largest international airports are named Kangerlussuaq/Søndre Strømfjord and Narsarsuaq.

**Flights:** It is possible to fly to Greenland around the year from Denmark with the national airline Air Greenland A/S. In the summer (june-august) there are connections 7 days a week with flights up till 12 a week. Air Iceland are responsible for the traffic between Iceland and the eastcoast of Greenland. Air Iceland serves also Westcoast of Greenland (Ilulissat, Nuuk and Narsarsuaq) at the height of the season.

**Departures and Passengers:** In 2008 started 33.196 airplanes from airports, heli ports and helistop. At the same time 432.067 passengers traveled. There has been a significant growth in the number of passengers the recent years.

## Turisterne

Mange turister ankommer til Grønland med fly. I 2008 er det skønnet at 36.000 turister kom ad denne vej. De fleste turister er fra Danmark. En stor del af dem er over 50 år. Turismen har været i fremgang siden 2002, hvor turismen oplevede et lavpunkt.

Turister i statistikkerne opgøres efter WTO's definition og omfatter derfor også personer der ankommer til landet med forretning mv. som formål med deres rejse.

Selvom andelen af danske turister fortsat er stor, er der sket et markant skift i fordelingen, så den procentvise andel af danske turister i forhold til det samlede antal er faldende selvom turismen er i fremgang. Det betyder at vi har fået bedre fat i andre markeder og ikke længere er så afhængige af et marked. Jf. tabel 2.3.

## Tourists

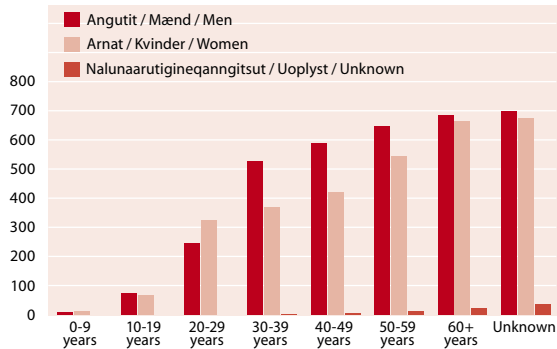

Many tourists arrive to Greenland by airplane. In 2008 it is estimated that 36.000 tourists came this way. Most tourist are from Denmark. A majority of them are over 50 years of age. Tourism has been steadily growing since 2002, after a world wide drop.

Tourist in the statistics are collected in accordance with the definition of WTO and includes persons who arrive with business etc. as purpose of their travel.

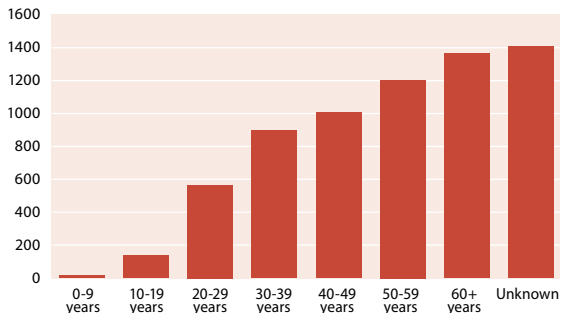

Even though the proportion of the Danish tourists remains high, there has been a marked shift in the distribution. So the percentage of the Danish tourists, in relation to the total number, is decreasing, even though tourism is in progress. It means that we are getting better contact with other markets and are no longer so dependent on one market. Cf. Table 2.3.

## Overnatningssteder

Der findes godt 50 overnatningssteder, jævnt fordelt over byer og bygder i Grøn-land. Den samlede værelseskapacitet udgør ca. 513.000 årligt, mens sengekapa-citeten ligger på ca. 939.000 om året. Over-natningsstederne spænder vidt i størrelse og standard; fra store 4 stjernede hoteller over sømandshjem til små vandrehjem og jægerhytter. I tilknytning til mange hoteller er der restaurant mv.

I 2007 udgjorde det samlede antal over-natninger ca. 235.000, mens antallet af overnattende gæster, såvel turister som grønlandere, udgjorde ca. 83.000. Det sva-rer til at gæsterne i gennemsnit overnatter knap 3 dage. Antallet af overnatninger og overnattende gæster har udvist betydelig vækst de senere år.

Overnatningsstederne i Region Midt er fortsat de mest besøgte og står for ca. halvdelen af alle overnatninger. Region Disko tegner sig på andenpladsen for ca. 20 pct. af overnatningerne.

Presset på overnatningsstederne varierer betydelig hen over året. Højsæsonen er månederne juli og august, hvor den gen-nemsnitlige belægning kommer over 50 pct. I de store byer kan den i enkelte uger nærme sig 90-100 pct.

## Accomodations

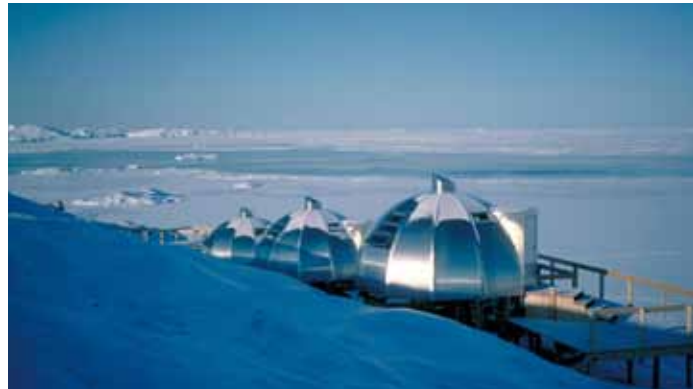

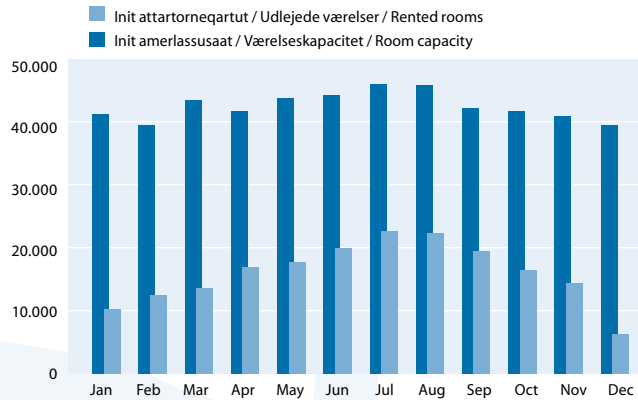

There are approximately 50 places of accom-modations spread equally over cities and villages in Greenland. The total capacity of rooms equals approximately 513.00 rooms a year, while the capacity of beds equals ap-proximately 939.00 beds a year. The places of accommodations varies in size and standard; from big hotels with 4 stars over sea mans hostels to small cottages. Many hotels offers services of restauration.

In 2007 total number of nights amounted to approximately 235.000, while the number of guests, Greenlandic as well as tourists, amounted to approximately 83. 000. Guests stayed in average in 3 days. The number of guestnights and guests have shown a signifi-cant increase over the latest years.

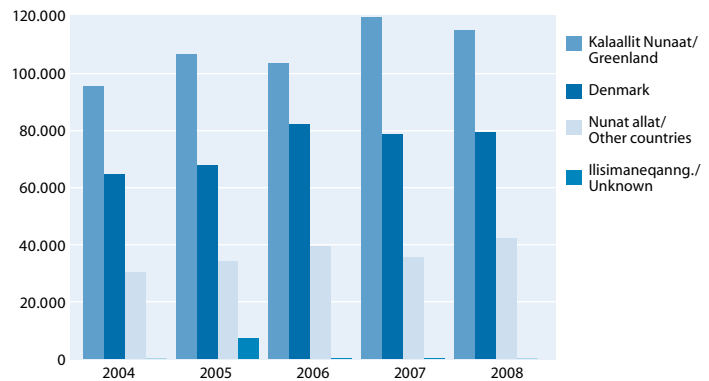

The places of accommodations in Region Mid are still the places where most visitors accom-modate and amounts for approximately half of all bed nights. Region Disko are on a sec-ond place with 20 pct. Of all bed nights.

The pressure on the places of accommo-dations varies considerably over the season. The high season is the months of July and August where the average accommodation rate is higher than 50 percent. In the big towns and in certain weeks the capacity pressure can sometimes raise to 90-100 pct.

## Krydstogtturismen

**Krydstogtturismen:** Krydstogtturismen er et område i kraftig vækst og med en stigende betydning for samfundøkonomien. I 2008 tegnede 42 skibe sig for 165 anløb. Skibene havde knap 29.000 gæster ombord.

**Krydstogtsturerne:** På stikprøvebasis undersøges krydstogtgæsterne mht. til fx nationalitet og alder. En stor del af gæsterne er fra Tyskland, England og USA. Størsteparten af gæsterne er over 50 år.

**Skibene:** Krydstogtsskibene varierer i størrelse fra de helt små med ca. 50 passagerer til skibe med op til 3000 passagerer. I perioden fra 2003 til 2008 har der været en markant stigning i antallet af de helt små skibe, der typisk er ekspeditionsskibe med operationer over hele Grønland, samt en stigning i antallet af mellemstore skibe med 500-1000 passagerer, der sejler på sydvestkysten.

## Cruise tourism

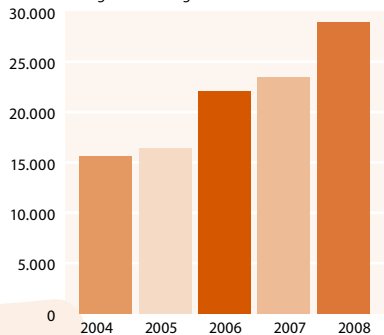

**Cruise tourism:** Cruise tourism is an area of considerable growth and with more and more importance for the economy. In 2008 42 vessels had 165 visits. The vessels carried with them almost 29.000 guests with them.

**Guests:** On a survey basis the guests on the cruise vessels are being questioned with regard to fx nationality and age. A majority of guests are from Germany, United Kingdom and USA. The majority of guests are over 50 years of age.

**Vessels:** The cruise vessels varies in size from very small vessels with 50 passengers to vessels carrying up to 3000 passengers. In the period 2003-2008 there has been a significant growth in very small vessels, typically expedition ships operating all over the coasts of Greenland together with a growth in mid size vessels carrying 500-1000 passengers, sailing on the west coast.
